Work Experience

Everon

SENIOR SOFTWARE ENGINEER

Remote

October 2024 - Current

- Spearheading the modernization of a 5-year-old legacy system by upgrading TypeScript and MongoDB.
- Conducting comprehensive product testing post-updates to ensure stability, functionality, and performance.
- Managing the integration and maintenance of microservices architecture and network infrastructure using Kubernetes, hosted on Azure.

Velotax

SENIOR SOFTWARE ENGINEER

Remote

December 2021 - June 2024

- Built scalable APIs with Node.js and Nest.js and implemented cloud solutions using AWS services such as Lambda, API Gateway, SQS, ECS, and more.
- Leveraged MongoDB for efficient data management and contributed to frontend projects using React.js, Next.js, styled-components, and antd.
- Integrated external services (B3, Binance, Foxbit) and payment platforms (PayPal, Pagar.me, StarkBank) to enhance system functionality.
- Designed, implemented, and maintained microservices architectures, ensuring scalability, reliability, and seamless integration within a dynamic infrastructure.

Bolsapp

FULL STACK DEVELOPER

Remote

April 2021- December 2021

- Built scalable APIs with Node.js and Nest.js and implemented cloud solutions using AWS services such as Lambda, API Gateway, SQS, ECS, and more.
- Leveraged MongoDB for efficient data management and contributed to frontend projects using React.js, Next.js, styled-components, and antd.
- Integrated external services (B3, Binance, Foxbit) and payment platforms (PayPal, Pagar.me, StarkBank) to enhance system functionality.
- Designed, implemented, and maintained microservices architectures, ensuring scalability, reliability, and seamless integration within a dynamic infrastructure.

One Immigration Consulting

BACKEND DEVELOPER

Remote

September 2020 - March 2021

- Developing APIs using Node.js (Express) and MongoDB, ensuring integration with the frontend.
- Implementing payment gateway integration with Stripe.
- Creating web scraping solutions using Puppeteer and Cheerio to collect data from Canadian government pages, optimizing the process of obtaining critical information for the system.

TechnicalSkills

Strongest Areas

Data Structures, Algorithms

Programming Languages

Javascript, Python, Go

Libraries/Frameworks

ReactJS, NextJS, NodeJS, NestJS, Typescript, Git, Kubernetes, Docker

Database

MongoDB, Firebase, PostgreSQL, MariaDB, DynamoDB, MySQL

Platforms

AWS, Vercel, Heroku

Education

Institute Federal Catarinense - Campus Videira

Bachelor of Science in Computer Science

Videira, Santa Catarina - Brazil

February 2016 - March 2024

- 7.77/10
